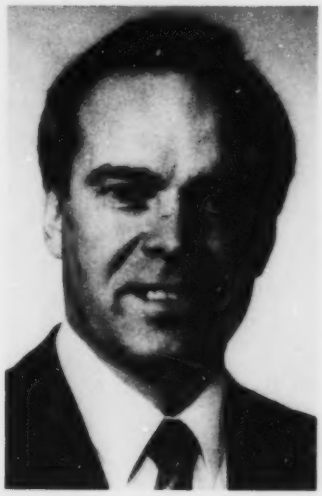
This directory was produced by RAK Communications in association with the Department of Science and Technology. It is based on information that the Department obtained through a recent survey of Saskatchewan software developers.

While every effort has been made to ensure completeness and accuracy, the above named parties disclaim any responsibility or liability for costs or damages that a person may incur by using part or all of the information contained within these pages.

Distribution of this directory and the appearance or absence of a company herein is not to be considered as an endorsement or non-endorsement of a specific company, product, or service.



A Message From The Premier of Saskatchewan

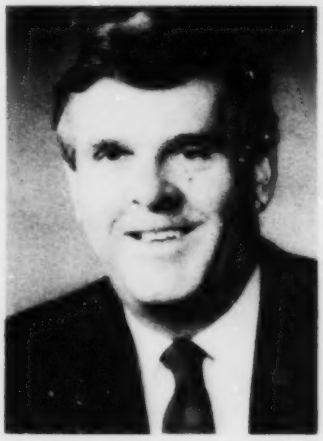
On behalf of the Government of Saskatchewan, I am pleased to introduce the Saskatchewan Software Directory, an important initiative of the Department of Science and Technology.

Advanced technology is altering the course of commerce, providing Saskatchewan business with powerful new administrative and analytical tools, opening new horizons, and putting our province at the top in this pioneering field.

Saskatchewan has an exciting future! The expanding software industry has a strategic role in that progress, and is a springboard for growth and diversification. The Saskatchewan Software Directory, produced by the Department of Science and Technology, is established to show the importance of advanced technology in today's world, and will be a valuable addition to your business library.

Grant Devine

Grant Devine
Premier
Government of Saskatchewan



A Message From The Minister of Science and Technology

It is a pleasure to introduce Saskatchewan's first Software Directory.

This publication is our way of highlighting a special group of innovators.... the software developers of our province. They have diverse capabilities in solving problems and improving efficiency across many other industrial sectors. As a result, we reap many economic and technological benefits.

Saskatchewan has earned a national and international reputation as a dynamic center for software development. It offers relatively low overhead costs, a high level of computer expertise, and a central location within the continent.

This directory is an excellent source of information about Saskatchewan's software capabilities, products, and services. I hope you will find it helpful.

Ray Meiklejohn

Hon. Ray Meiklejohn

Introduction

This directory was compiled using information recently obtained from a questionnaire developed by the Department of Science and Technology, and targetted at Saskatchewan's software sector.

The purpose of the survey was to examine the state of the emergence of the software industry in this province, and to provide a current inventory of the capabilities, products, and services of software developers, for use provincially, nationally, and internationally. It is also intended as a procurement guide for both the private and public sectors.

Every attempt has been made to canvas as many companies as possible within the broadest context of software developers. It is recognized that the directory may still be incomplete due to lack of knowledge of a company's existence, or lack of response to the questionnaire.

The Department of Science and Technology gratefully acknowledges the co-operation of the software firms through the various phases of this project.

COMPANY PROFILES

A. B. Data Sales Inc.

2210 Hanselman Avenue
Saskatoon, Saskatchewan
S7L 6A4
Telephone: (306) 652-7228

•**Principal Officer:**
* David Reid, President

•**Contact:** Mike Easton

•**Established In:** February 1985

•**Make of Computers Software Developed For:**
* IBM

•**Operating System(s) Software Developed For:**
* Microcomputer: MS-DOS; PC-MOS

•**Programming Environments Company Has Expertise In:**
* Programming Languages
* Networking
* Data Communications

•**Principal Sectors For Which Application Software Is Developed:**
* Communication
* Construction
* General Business Software
* Retail Trade
* Wholesale Trade
* Custom Software Houses

•**Products Offered:**
* Video Craft - Video Rental Store Management
* Tracker - Construction Project Progress Tracking
* Office Automation - Package to Totally Automate an Office
* Rent-To-Own - Software To Run Rent-To-Own Stores
* Destiny - Program Generator
* Destiny - Turbo Pascal Code Generator

Advanced DataSystems Ltd.

3032 Louise Street
Saskatoon, Saskatchewan
S7L 3L8
Telephone: (306) 373-8060
Fax: (306) 477-1024

•**Principal Officers:**
* Dallas Howe, President
* Paul Riome, Vice-President

•**Contact:** Paul Riome

•**Established In:** 1976

•**Make of Computers Software Developed For:**
* Contel
* Unisys

•**Operating Systems Software Developed For:**
* Microcomputer: Unix/Compatible
* Minicomputer: Unix/Compatible

•**Programming Environments Company Has Expertise In:**
* Programming Languages
* Program Generators/4GLs
* Database Management Systems
* Image Technology
* Networking

•**Principal Sectors For Which Application Software Is Developed:**
* General Business Software
* Government
* Accounting

•**Products Offered:**
* Impacct - Professional Accountant's Package
* General Business Accounting/Financial Applications
* Image Processing Applications
* Custom Software

Analog Business Machines

Box 156
Weyburn, Saskatchewan
S4H 2J9
Telephone: (306) 842-5849

•**Principal Officer:**
* Judy Holyer, Sole Proprietor

•**Contact:** Judy Holyer

•**Established In:** April 1986

•**Make of Computer(s) Software Developed For:**
* IBM and Compatibles

•**Operating System(s) Software Developed For:**
* Microcomputer: MS-DOS

•**Programming Environments Company Has Expertise In:**
* Programming Languages
* Networking
* Database Management Systems
* Spreadsheets/Templates

•**Principal Sectors For Which Application Software Is Developed:**
* Agriculture
* Construction

Government Programs

The following programs are available through the Department of Science and Technology to assist Saskatchewan's advanced technology firms:

THE INDUSTRIAL RESEARCH PROGRAM is intended to complement federal R&D programs by providing support where federal assistance is insufficient from a provincial perspective.

THE JOINT HIGH TECHNOLOGY RESEARCH PROGRAM supports research projects in areas of mutual government and industry interest. It provides assistance for research activities performed by industrial companies and supported by the province in technology fields of high provincial priority.

THE REQUEST FOR PROPOSALS PROGRAM assists Saskatchewan companies to compete for large development projects originating outside the province. Through this program, companies can offset part of their preparation costs, compete with other national firms, and obtain more contracts.

THE INFORMATION TRANSFER PROGRAM provides opportunities to bring industry-oriented technological information into the province through activities such as seminars, conferences, and invited speakers. Support is negotiated on a cost-shared basis.

MARKETING SUPPORT is a program intended to strengthen the strategic marketing capabilities of Saskatchewan advanced technology firms.

FIRST-USER RISK-REDUCTION assists companies in market penetration and helps offset the risks perceived by the first users of a new, commercially untested product .
